

HYBRID & ELECTRIC

CARDONE has been an aftermarket pioneer in electrical products since we first opened our doors in 1970. Our dedicated product engineers keep pace with each new generation of vehicle advancements so we can offer our customers the most complete coverage on the latest applications. As the surge of new hybrid and full electric power trains begins to gain momentum, CARDONE is already out in front with our ReCharged line of products specifically tailored to meet demands of this rapidly expanding category.

New & Reman Products

- Drive Motor Batteries
- Drive Motor Inverters
- Auxiliary Coolant & Electric Water Pumps
- Drive Motor Battery Safety Plugs
- Drive Motor Battery Cooling Fans

Application Coverage

CARDONE is continuously expanding coverage to match the wave of expansion in this category. We offer ReCharged parts for major hybrid & electric vehicle applications from Toyota, Honda, Nissan, Ford and GM from 2001-2017. Don't see what you need? Contact your WSI sales representative for future application coverage requests.

Did You Know?

The number of hybrid & electric vehicles in the US has increased from 1.3 million in 2008 to 4.7 million in 2017.

In the last 2 years electric vehicle sales have grown by 125% in Canada.

CARDONETM
WE BUILD IT BETTER

Remanufactured DRIVE MOTOR BATTERIES

Problem: Batteries lose their charge over time and become far less efficient.

CARDONE Solution: CARDONE offers a high-quality remanufactured solution for the most failure-prone applications on the road with more coverage on the way. These batteries are remanufactured in the U.S.A. and meet quality standards that are unmatched by other reman battery suppliers.

The following procedures are done to ensure product reliability and long life:

- NiMH modules are recharged
- Entire battery pack is balanced to ensure each module is operating at consistent efficiency
- Electronic Control Unit is replaced and 100% tested to ensure battery does not fail without warning
- Relays are 100% tested, which is critical to ensure lasting battery life

Drive motor batteries have a shelf life of approximately 90 days, so please note that batteries sitting for longer may need to be recharged. See reverse for competitor comparison of battery life span and efficiency.
